

Introducing Directory Builder 3.0

Directory Builder 3.0 provides a flexible and extremely cost effective method to produce healthcare directories. Driven by customer's needs, Directory Builder 3.0 offers many new features and benefits:

- **Improved Interface**
 - Cleaner, more organized layout
 - Jobs that require customer attention stand out more clearly
 - Improved navigation allows for faster access to your information
- **File uploads increased to 2GB**
- **New “multi-threaded” design**
 - Simultaneously track the progress of every aspect
 - Cover design
 - Intro pages / inserts
 - Data preparation
 - Layout specifications
 - Complete run
 - 508-compliance remediation
 - Print production
 - Less waiting time for other areas to complete
 - Data preparation occurs separately from layout design
 - Final data can be reviewed while layout is still in progress and the number of intro pages is unknown
 - All aspects of directory creation in one location
- **The All-New Change Tracker**
 - All requested changes presented in one location for quick reference
 - See the status of each change request to monitor overall progress
 - Changes that are no longer applicable are greyed out
 - All completed changes are cataloged in a single location
